How to Survive in the City Using the Way of Jalal

Have you ever imagined leaving the safety of your home and stepping into the city for the very first time? Would you know what to do if danger appeared from the shadows? The city is full of noisy roads, strange creatures and hidden enemies. Fortunately, the ancient Way of Jalal teaches seven special skills that can help a cat survive. Read on to discover how each skill can keep you safe.

Open Mind

When you enter a new place, things may not happen as you expect. Therefore, you need to keep an open mind. If one plan does not work, you must be ready to think of another. By looking at problems in different ways, you can find solutions and avoid danger.

Awareness

The city is full of sights, sounds and smells. As danger can appear at any moment, you must pay attention to everything around you. Listen carefully, watch closely and trust your senses. Due to this skill, you may spot trouble before it reaches you.

Hunting

Finding food is important if you want to survive. To hunt successfully, you need to move quietly and patiently. If you rush, your prey may escape. A skilled hunter waits for the perfect moment before striking.

Slow-Time

Sometimes danger moves very quickly. When this happens, Slow-Time can help. By calming your mind and focusing completely, everything seems to move more slowly. As a result, you will have more time to dodge attacks and make good decisions.

Moving Circles

You may face more than one enemy at a time. Since standing still makes you an easy target, you should keep moving. The skill of Moving Circles allows you to stay in motion while watching every direction. It is much harder for enemies to surround you.

Shadow-Walking

There are times when fighting is not the best choice. If danger is too great, it is often safer to avoid being seen. By staying silent and moving through dark places, you can travel unnoticed. In this way, you can escape trouble without anyone knowing you were there.

Trust Yourself

The final skill is the most challenging because it comes from inside you. Even when you feel afraid, you must believe in yourself. If you trust your training and your instincts, you will be able to face challenges with confidence. This skill helps you use all the others successfully.

The city can be a dangerous and unpredictable place. However, by using the seven skills of the Way of Jalal, a cat can stay safe and overcome many challenges. These skills will help you survive and find your way through the Outside.

Annotation key — use four colours

Colour 1: Rhetorical question
question that draws the reader in without needing an answer

Colour 2: Subheadings
one-word label that organises each skill section

Colour 3: Causal connectives
therefore, as a result, due to, since, which means

Colour 4: Fronted adverbials
By [doing this]… / As a result,… / When this happens…
